NOTES TO USER

Certain areas not on the special flood hazard areas (Zones A and V) may be protected by flood control structures. This map is for flood insurance and flood plain management purposes only. It does not necessarily show all areas subject to flooding in the community or all planimetric features outside special flood hazard areas. The coastal flooding elevations shown may include the effects of wave action and may differ significantly from those developed by the National Weather Service for hurricane evacuation planning. Coastal base flood elevations apply only landward of the shoreline shown on this map. For adjoining map panels, see separately printed Map Index.
