Reason for Amendment:

To appropriate funds for a contract with VHB to collect data to help understand the nature of traffic congestion, particularly in the village area, and to begin to understand the factors contributing to such congestion. Their proposal includes deploying 12 cameras (including 5 MioVision cameras that pick-up passing mobile phone signals to aid in determining accurate travel times between points) and 4 pneumatic tube counters that allow for vehicle speed and classification counts. This deployment will allow them to capture seven days' worth of data for vehicle turning movements, pedestrian crossing movements, bicycle turning movements, and vehicle classifications. Their proposal includes analyzing two days' worth of this data – Saturday and the busiest weekday – along with the data that will be collected using volunteers to record observations.
